

**THE METROPOLITAN WATER DISTRICT
OF SOUTHERN CALIFORNIA**

RESOLUTION 8469

**RESOLUTION OF THE BOARD OF DIRECTORS
OF THE METROPOLITAN WATER DISTRICT
OF SOUTHERN CALIFORNIA
FIXING AND ADOPTING NEW DEMAND CHARGE**

WHEREAS, at its meeting on December 14, 1993, the Board of Directors ("Board") of The Metropolitan Water District of Southern California ("Metropolitan") approved the rate structure and additional revenue sources described in the Board letter on the Financial Structure Study dated December 1, 1993, including a new demand charge, with implementation of these charges to begin in fiscal year 1995-96;

WHEREAS, providing firm revenue sources is a primary goal of such revenue structure;

WHEREAS, the amount of revenue to be raised by the new demand charge shall be as determined by the Board and allocation of such charge among member public agencies shall be in accordance with the method established by the Board;

WHEREAS, Metropolitan has legal authority to adopt such new demand charge as a water rate pursuant to Section 134 of the Metropolitan Water District Act, as a capital facilities fee pursuant to Section 54999.2 of the California Government Code and as an availability of service charge pursuant to Section 134.5 of the Metropolitan Water District Act;

WHEREAS, under authority of Sections 133 and 134 of the Metropolitan Water District Act, the Board has the authority to fix the rate or rates for water as will result in revenue which, together with other revenues, will pay Metropolitan's operating expenses and provide for payment of other costs, including payment of the interest and principal of Metropolitan's bonded debt;

WHEREAS, pursuant to Resolution 8329, adopted by the Board on July 9, 1991, proceeds of the readiness-to-serve charge, new demand charge and other revenues from the sale or availability of water are pledged to the payment of Metropolitan's outstanding revenue bonds issued and to be issued pursuant to Resolution 8329;

WHEREAS, under authority of Government Code Section 54999.2 Metropolitan may levy a capital facilities fee to pay the capital cost of facilities for the provision of water service;

WHEREAS, the new demand charge is intended to recover the debt service of expenditures for projects needed to satisfy anticipated new demands on Metropolitan, as shown in the Nexus Study dated January, 1995, prepared by Metropolitan in support of the new demand charge;

WHEREAS, under authority of Section 134.5 of the Metropolitan Water District Act, an availability of service charge may be collected from the member public agencies within Metropolitan;

WHEREAS, by Resolution 8465, adopted at its meeting held January 10, 1995, Metropolitan's Board resolved and determined that the public interest and necessity require Metropolitan to develop firm net revenues, exclusive of ad valorem property taxes, through imposition of a new demand charge on all sales representing new demands on Metropolitan, as described below, to be collected from Metropolitan's member public agencies;

WHEREAS, notice was given by Resolution 8465 to the public and to each member public agency of The Metropolitan Water District of Southern California of the intention of Metropolitan's Board to consider and take action at its regular meeting to be held March 13, 1995, on the General Manager's recommendation to impose a new demand charge for fiscal year 1995-96 in the amount of \$1,000 per acre foot for all new demands by a member agency on Metropolitan, as described in Resolution 8465;

WHEREAS, notice of the proposed new demand charge and of a public hearing on the date and at the time and location specified in Resolution 8465 was published prior to the hearings in various newspapers of general circulation within Metropolitan; and

WHEREAS, the Board conducted a public hearing at its regular meeting on February 14, 1995, at which interested parties were given the opportunity to present their views regarding the proposed new demand charge.

NOW, THEREFORE, the Board of Directors of The Metropolitan Water District of Southern California does hereby resolve, determine and order as follows:

Section 1. That the Board of Directors of Metropolitan hereby fixes and adopts a new demand charge for fiscal year 1995-96.

Section 2. That such new demand charge shall be in an amount sufficient to provide for payment of the debt service, not paid from ad valorem property taxes, of capital expenditures for projects needed to serve anticipated increases in demands on Metropolitan.

Section 3. That such new demand charge for 1995-96 shall be a water rate of \$1,000 per acre foot for all new demands by a member agency on Metropolitan, determined as provided in Section 7 below.

Section 4. That in the alternative, and without duplication, the new demand charge shall be a capital facilities fee in the amount of \$1,000 per acre foot of new demand on Metropolitan, determined as provided in Section 7 below.

Section 5. That this Board finds that the new demand charge is necessary for the purpose of financing construction costs of public utility facilities furnished by Metropolitan, and does not exceed the proportionate share of the cost of the public utility facilities of benefit to each person or property being charged, based upon the proportionate share of use of those facilities.

Section 6. That in the alternative, and without duplication, the new demand charge shall be an availability service charge pursuant to Section 134.5 of the Metropolitan Water District Act.

Section 7. That the new demand charge shall be incurred by a member public agency when the average of the member public agency's purchases (in acre feet) from Metropolitan in the four most recent years, including fiscal year 1995-96, after adjustment for long-term storage water, exceed such member agency's new demand charge base. Long-term seasonal storage deliveries, seasonal storage deliveries during May through September 1993 and May and June 1994, cyclic storage, direct groundwater replenishment deliveries, and water taken under one-time drought storage agreements, Cooperative Storage Program through April 12, 1994, and the 1993 Demonstration Program are subtracted from the water sales calculation through the fiscal year period ending June 30, 1994. Beginning with fiscal year 1994-95, long-term seasonal storage service water is defined as water that a member public agency leaves in storage past the end of the fiscal year through avoided production during a period of availability (normally October 1 through April 30). Long-term seasonal storage service, cyclic storage, Cooperative Storage Program, direct groundwater replenishment and contractual long-term storage water deliveries will be excluded from the new demand charge calculation during the year of delivery but will be included in the year of use. Member public agencies shall indicate the amount and year in which the long-term seasonal storage service, cyclic storage, Cooperative Storage Program, direct groundwater replenishment and contractual long-term storage water deliveries are used within seven years, including the year in which the water was delivered. Member public agencies overlying a common groundwater basin shall be allowed to account for their purchases as a single, common purchaser. Metropolitan sales of reclaimed water under the Local Projects Program and groundwater under the Groundwater Recovery Program shall not be included in the new demand charge calculation.

Section 8. That each member public agency's new demand charge base (in acre feet) has been determined on the largest of three averages: 1) the average of its purchases from Metropolitan in the three fiscal years 1989-90 through 1991-92, excluding one-time drought storage sales; 2) the average of its purchases from Metropolitan in the four fiscal years 1989-90 through 1992-93, excluding one-time drought storage agreement sales and seasonal storage deliveries attributable to May and June 1993; or 3) its readiness-to-serve charge allocation for fiscal year 1995-96. Each member public agency's new demand charge base is as follows:

Proposed New Demand Charge Base

<u>Member Agency</u>	<u>Base Amount (AF)</u>
Anaheim	24,944
Beverly Hills	13,614
Burbank	20,446
Calleguas MWD	99,025
Central Basin MWD	120,257
Chino Basin MWD	76,265
Coastal MWD	42,243
Compton	5,026
Eastern MWD	55,603
Foothill MWD	9,610
Fullerton	12,253
Glendale	26,456
Las Virgenes MWD	18,525
Long Beach	42,539
Los Angeles	358,128
MWD of Orange Co.	242,576
Pasadena	22,638
San Diego CWA	559,220
San Fernando	903
San Marino	1,327
Santa Ana	15,840
Santa Monica	8,889
Three Valleys MWD	69,664
Torrance	20,311
Upper San Gabriel MWD	71,899
West Basin MWD.	167,634
Western MWD of Riverside Co.	78,260
TOTAL	2,184,095

Section 9. That this Board finds and determines that such new demand charge base is a reasonable approximation of each member agency's current demands on Metropolitan's system.

Section 10. That upon payment of any new demand charge by a member agency, that member agency's new demand charge base shall be increased by an amount equal to the quantity of water on which the new demand charge was paid.

Section 11. That the new demand charge shall be incurred upon Metropolitan's determination that a member agency's historic average deliveries of Metropolitan water in the immediately preceding four fiscal years have exceeded such member agency's new demand charge base. The determination of new demand charges for Metropolitan water delivered in 1995-96 shall be made early in fiscal year 1996-97. In no event shall a new demand charge be incurred for water delivered in any year after 1994-95 if in such year the member agency has not purchased Metropolitan water in an amount at least equal to its initial new demand charge base.

Section 12. That such new demand charge shall be due and payable in the fiscal year following the year in which Metropolitan determines that the new demand charge has been incurred. Such new demand charge may be paid, without penalty, in equal monthly installments over a period of up to fifteen (15) years, provided that amounts subject to deferred payment shall bear interest at a rate determined by Metropolitan (which shall be equal to Metropolitan's weighted average cost of funds at the time of such determination), from the date due until payment is received by Metropolitan.

Section 13. That the new demand charge and the new demand charge base for each member public agency, the method of its calculation, and the project costs, cost allocations and other data used in its determination are as specified in the Nexus Study on file and available for review by interested parties at Metropolitan's headquarters.

Section 14. That the General Manager and the General Counsel are hereby authorized to do all things necessary and desirable to accomplish the purposes of this Resolution, including, without limitation, the commencement or defense of litigation.

Section 15. That this Board finds that the proposed new demand charge is exempt from the provisions of the California Environmental Quality Act (CEQA) since it constitutes the creation of government funding mechanisms which do not involve commitment to any specific project which may result in a potentially

significant physical impact on the environment or which will be used to fund projects which have CEQA documentation or which will have CEQA documentation in place prior to construction of any facility or facilities.

I HEREBY CERTIFY, that the foregoing resolution was adopted by the Board of Directors of The Metropolitan Water District of Southern California on March 14, 1995.
