The Chair declared a quorum present.

Director Moret took her seat at 9:28 a.m.

**43326** Chairman Pace inquired if there were any additions to the agenda. There being none, the Chair declared only those matters listed on the agenda would be considered. **43327** Chairman Pace invited members of the public to address the Board on matters within the Board's jurisdiction.

Terry Spragg of Spragg & Associates, commented on Item 8-15, the transfer of Santa Ana River Basin native groundwater into Metropolitan's service area. He made reference to the discussion at the committee meetings regarding the definition of what constitutes transfer of water from outside the District, and again asked that the water bag transfer technology be included in any studies.

**43328** Chairman Pace gave his "State of the MET" address to the Board, thanking the Directors and staff for their support since the election in helping to implement the District's programs. He stated that 1999 is the beginning of an era of change at Metropolitan, an opportunity to build on the past and create a new vision for the future. He reported that the search for a new General Manager is underway. He also commented on the increased population in Southern California, expected to double in the year 2020. Today our future is defined much more in terms of leadership and local resources management, instead of relying on increased water imports to meet the needs of the growing region. Metropolitan and its 27 member agencies have invested millions of dollars in conservation, recycling, and storage. That is one of the main reasons we are importing the same amount of water we did a decade ago even though five million residents have been added to the region. Metropolitan is still in the business of getting the best quality water at the lowest possible price

for the 16 million people in Southern California, and those to come, who depend on Metropolitan.

Chairman Pace stated the major challenges ahead involve following through on commitments already made, such as completing the Eastside Reservoir Project, carrying forward the CALFED Bay-Delta Program, and implementing the California Plan for Colorado River water. Signing the San Diego Exchange Agreement and securing the funding for the lining of the All-American and Coachella Canals were major milestones on the road to the future of resource management in the 21<sup>st</sup> century. Metropolitan needs to recognize that water policy has become a major issue for the public. The institutions that built the modern water system in California are changing, and Metropolitan will have to incorporate new ideas and practices. The Chair remarked that the Board has already taken steps to reduce its size from 51 to 38 Directors and to change the format and makeup of its committees. Through the strategic planning process, Metropolitan is redefining its future role in Southern California's water industry.

To function effectively in this new environment, Metropolitan will have to be more visible and more active in Sacramento, Washington, and in the communities it serves. To help Metropolitan meet the challenges of this changing world, Chairman Pace committed to take the Board to an even higher level of efficiency and effectiveness as a governing body to meet Southern California's water needs today and in the future.

**43329** On behalf of the Board and in recognition of their outstanding service, Chairman Pace presented plaques to former Board Officer and Standing Committee Chairmen:

The membership on the subcommittees are as follows:

Subcommittee on Rules: Directors Barbosa (Chair), Luddy (Vice Chair), Pace (ex officio), Castro, Frahm, King, and Owen.

Subcommittee on Organization and Personnel: Directors Wein (Chair), Rascon (Vice Chair), Bannister, Castro, Gilbert, Hansen, Krauel, Krieger, McMurray, Miller, Moret, and Turner.

MWD Negotiating Team: Directors Pace (ex officio), Foley, Luddy, Owen, and Peterson.

**43341** Chairman Pace reported that in the past few weeks he spent most of his time meeting with various Directors, legislators, community and business leaders, and staff to prepare himself for his new position as Chairman of the Board and was gratified by the cooperation and assistance he received from everyone. The Chair also stated he attended the inauguration of Governor Gray Davis which provided him with the opportunity to share his thoughts regarding the importance of water to the State of California.

**43342** Strategic Plan Steering Committee Chairman King announced the postponement of the third Board workshop due to comments from Directors and member agencies that the General Manager should participate in future discussions. Director King then updated the Board on the Strategic Planning Process through the first six months, and urged all Directors to take advantage of the time during the postponement of the workshop to review the alternative visions. He also announced the two public workshops scheduled for later in January.

**43343** Regarding Colorado River matters, Paul Cunningham, principal negotiator for Metropolitan, reported there were no negotiation sessions held since the last Board Meeting, except for several conference calls to arrange future negotiation meetings. The MWD Negotiating Team is currently reviewing the

MOU entered into between Imperial Irrigation District (IID), Coachella Valley Water District (CVWD), and the Department of the Interior.

**43344** In a further report on Colorado River matters, Paul Cunningham, Metropolitan's principal negotiator, commented on the recommended policy paper describing an approach to the Colorado River issues attached to the letter from the MWD Negotiating Team dated January 6, 1999. Mr. Cunningham stated the Board letter lays out the essence of the negotiations, principally between IID and CVWD to date, with respect to how they would like various Colorado River issues resolved within the context of the 1931 regulations. The Negotiating Team has recommended to the Board not that it change its policy of keeping a full Colorado River Aqueduct, but it has laid out a series of questions about whether or not the fundamental premise of the negotiations is the proper one. The basic question being asked is whether Metropolitan should assume that the Secretary of the Interior's 1931 regulations are unchangeable. Mr. Cunningham then reviewed the items covered in the paper titled "Approaches to Implementing Metropolitan's Policy Regarding Required Volume of Colorado River Water Supplies."

Following a lengthy discussion, Vice Chairman Barbosa moved, seconded by Director Morris, that the Board endorse the Policy Position Paper entitled "Approaches to Implementing Metropolitan's Policy Regarding Required Volume of Colorado River Water Supplies", as set forth in the attachment to the letter from the MWD Negotiating Team dated January 6, 1999.

Director Mylne requested that an additional sentence be included to paragraph II C of the policy paper, to read:

"Further, Metropolitan has agreed to San Diego Water Authority transfer rates which are below MWD System Cost Recovery in order to obtain 92,000 acre-feet conserved water from the state funded lining of the All American and Coachella canals and groundwater basin storage."

This should be inserted before the sentence beginning with, "Finally Metropolitan and its member agencies ...." Director Mylne offered this as an amendment to the motion.

Director Frahm then asked that Director Mylne's added sentence be revised, to read as follows:

"Further, Metropolitan has agreed to San Diego Water Authority-MWD Exchange Agreement and the budget

appropriation of \$235 million of state funding in order to obtain up to 92,000 acre-feet conserved water from the lining of the All American and Coachella Canals and groundwater basin storage."

Following comments of Directors, the Chairman called for a vote on the original motion made by Vice Chairman Barbosa, which carried.

Directors Frahm, Krauel, Lewis, Murph, Tinker, and Turner requested to be recorded as abstaining.

Director Mylne requested to be recorded as voting no.

**43345** Deputy General Manager Quinn reported on the allocation of water supplies Metropolitan is expected to receive this year; 1.2 million acre-feet from the Colorado River and 1.1 million acre-feet from the State Water Project. It is expected the demands on Metropolitan will be about 1.7 million acre-feet, leaving us with a good supply of water for this year. Mr. Quinn stated that on December 18, 1998, CALFED released its Phase II report. Governor Davis embraced the CALFED process in his "State of the State" address. The report included important decisions beneficial to Metropolitan. Mr. Quinn announced that on January 27, 1999, a salinity summit will be held at Cal Poly, Pomona, to discuss the implementation of a regional salinity management control program.

**43346** General Counsel Taylor reported on the formation of the Reserve Management Committee (RMC) made up of regulatory agencies, Metropolitan, and the County of Riverside, to manage the Eastside-Skinner habitat complex. In settling some of the condemnation cases for the Eastside acquisitions, the RMC contributed money to Metropolitan for acquiring a number of the condemnation properties so a portion of those properties would be held as part of the mitigation properties. The RMC also has received a check for \$650,000 which represents the sale of the credits of some of the properties which they contributed to in the settlement of some of the condemnation properties which they will hold both for management purposes and for acquisition of additional properties. The developers who contributed money are delighted with the process in that they get through the required permitting process in less than one month compared to several years. That is helping to contribute to the success of the program.

Directors Hill and Troxel withdrew from the Meeting at 11:35 a.m.

43347 The reports of the Committee Chairs are as follows:

Chairman Pace reported nothing further from the Executive Committee.

Budget and Finance Committee Chairman Castro stated the committee considered the items that were assigned to it by the Rules Subcommittee and would report at the appropriate time the actions that were taken. He stated the committee spent some time going over its mission and how to organize itself with going forward and highlighting some of the issues that the committee would like to look at over the next six to eighteen months and taking a longer term perspective than the committee had traditionally taken. Most emphasis will be on the budget process.

Engineering and Operations Committee Chairman Luddy reported that Agenda Item 8-2 regarding the types of motorboats on Eastside Reservoir was continued, and that staff was requested to consider drawing up specific policy language that would address allowing some boat usage without increasing the contamination of the water.

Legal and Claims Committee Chairman Owen stated that in his committee discussions were held which involved policy questions and which were deferred to staff. The committee approved all the items on its agenda, and requested that Agenda Item 8-13 be added to the Consent Calendar.
