#### June 12, 2001 Board Meeting

#### Subject

10-1

Status report for the Inland Feeder Project for the month ending April 2001

[Any discussion of potential litigation to be heard in closed session. Conference with legal counsel – significant exposure to litigation (two matters); to be heard in closed session pursuant to Gov. Code § 54956.9(b)]

#### Description

#### **Arrowhead Tunnels**

In April 2001 the Board approved a request to authorize the Chief Executive Officer to accept the amended Special-Use Permit and advertise the Arrowhead Tunnels if the conditions of the permit are consistent with agreements established in prior discussions with the United States Forest Service (USFS). A draft of the amended Special-Use Permit was received from the USFS and is being reviewed by staff.

#### Arrowhead West Tunnel – Reach 1

Metropolitan has received the contractor's submittal of claimed costs regarding delay and deletion of mining. Staff is reviewing and evaluating the submittal. Negotiations will be initiated with the contractor following the review.

#### Arrowhead East Tunnel - City Creek Heading - Reach 2

The contractor has completed installation of the final impermeable liner (8,000 feet). Approximately 90 percent of concrete backfill behind the liner is complete. Work is scheduled for completion by late-2001. Negotiations with the contractor regarding closure of City Creek portal are complete and extra work orders have been issued to complete the work.

#### Highland Pipeline - Reach 3

Design activities have been placed on hold pending receipt of the final amended Special-Use Permit from the USFS.

#### Mentone Pipeline – Reach 4

The contractor installed 1,200 feet of pipe during the reporting period for a total of 17,800 feet to date (89 percent complete). This reach is scheduled for completion in late-2001.

#### Riverside Badlands Tunnel – Reaches 5 & 6

In April, the tunnel boring machine (TBM) advanced another 2,052 feet for a total of 35,262 feet (85 percent complete). Ground conditions have improved from previous months resulting in increased mining rates. The contractor continues to perform grouting as necessary to reduce groundwater inflows ahead of the TBM (see **Attachment 1** for a summary of tunneling progress).

#### **Budget and Schedule**

Based on proceeding with the existing project, which includes the construction of the Arrowhead Tunnels, the projected total cost for the program is \$980 million with a completion date of late 2006. Total expenditures through April 2001 are \$524.7 million (see Attachment 2 for a financial summary/project cash flow and Attachment 3 for a budget comparison and schedule summary/remaining budget). The project budget remains unchanged at \$1.1865 billion.

## Policy

Board Request.

### **Fiscal Impact**

Refer to the attachments.

W 5/17/2001 Date **İ**Wolfe Manager, Corporate Resources
