**Date:** December 7, 2009  
**To:** Business and Finance Committee  
**From:** Brian G. Thomas, Assistant General Manager/Chief Financial Officer  
**Subject:** Swap Monthly Report, November 2009

This letter provides a summary of the interest rate swaps outstanding as of November 30, 2009. These transactions are consistent with Board policy and Section 5922 of the California Government code, and have been executed to reduce debt service costs and reduce duration and interest rate risk.

As approved by the Board, Metropolitan has \$1.41 billion in outstanding interest rate swaps. These transactions and their associated bonds have resulted in \$63.0 million in savings through the date of this report. The mark-to-market value of the portfolio is a negative \$137.4 million, reflecting interest rates as of November 30, 2009, which were lower than when these swaps were executed. Net exposure to all counterparties is within Board-approved guidelines. As of November 30, 2009, Metropolitan had \$7.1 million of collateral posted with one swap counterparty.

At the September 2008 Board meeting, the Board approved \$500 million of interest rate swap authority for the next two years. Staff will continue to monitor the market for opportunities and work with the committee on transactions that meet Metropolitan's policies and financial objectives.
