

# Update on Approaches to Encourage Local Resources Development

Conservation and Local Resources Committee  
Item 4a  
April 9, 2019

# Overview

- Three Action Areas in Local Resources Development
  - Improve database of potential projects
  - Stormwater pilot programs
  - Developing alternative approaches
- Next Steps

# Proposed Actions to Develop Data and Criteria

Action 1

Improve database  
of potential  
projects

Action 2

Stormwater pilot  
programs

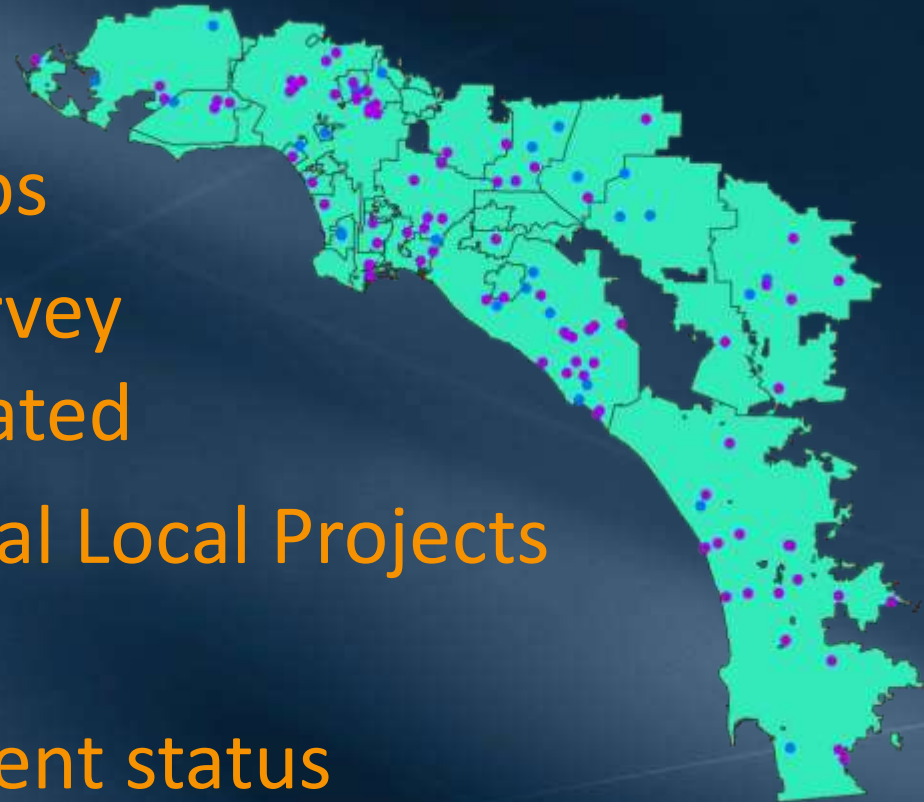

Action 3

Developing  
alternative  
approaches

# Action 1 – Improve Database of Potential Projects

Purpose: Develop a comprehensive local projects database

- Staff assigned as Member Agency Reps
- Local Production Survey improved and circulated
- Planned and Potential Local Projects Survey redesigned
- Improved development status

# Proposed Action 2a – Direct Use Stormwater Pilot

Purpose: Collect data on water supply benefits, measurement and cost

- Scope and administrative process being developed
- C&LR Committee discussion on scope at May meeting
- MAMM discussion at May meeting
- WP&S action at July meeting

# Proposed Action 2b – Recharge Stormwater Pilot

**Purpose: Evaluate the relationship between stormwater capture and groundwater recharge**

- Scope and administrative process being developed
- C&LR Committee discussion on Current Regulatory Climate at June meeting
- Request-For-Proposals process under development

# Proposed Action 3 – Developing Alternative Approaches

Goal: Identify criteria and information for projects to be developed under alternative approaches

- Potential impacts and benefits
  - Water supply reliability
  - Distribution and treatment capacity
  - System reliability and redundancy
  - Water quality
  - Emergency

# Developing Alternative Approaches

Some questions and areas of consideration for discussion:

- How do we identify and develop local projects that provide additional regional benefit?
- Is there an added regional value in developing resources in certain areas?
- How can we use criteria to support development of projects as opposed to eliminating them?
- How do we account for Metropolitan's financial exposure with alternative approaches?
- How do we evaluate impacts to existing assets and system?

# Next Steps

- Incorporate Committee feedback
- Continue discussions with Member Agency Managers
- Continue work on Action 1 - Improving Database of Projects (Mid-March rollout)
- Continue development of project scopes for Action 2 - Stormwater Pilot Programs

# Discussion
